Week 5 Meeting Minutes

PLACE AND DATE

Ingkarni Wardli Room 4.48 at 4:00 PM on Monday 26th March 2018

ATTENDEES

1. Jiexin Li

2. Tianshuo Zhang

3. Xiyu Zhang

4. Christoph Treude

MEETING RECORDINGS

What did we do this week that helped the development team meet the sprint goal?

1. We have designed a local database and implemented it.

2. We have already get information from GitHub.

3. We have a meeting with our supervisor on this Monday, and following are answers for questions in our 4th agenda.

   -Project details

   Question 1: The function of login was implemented by OAuth and there are many scopes that can be selected. We are confusing about Which one is suitable for our project? (Xiyu Zhang)

   Answer: Christoph has given us a suggestion that we can choose 'repo' to be our scope on Github API, because the description of that is "Grants read/write access to code, commit statues,

invitations, collaborators, adding team memberships, and deployment statues for public and private repositories and organization. In other words, it is suitable for our project due to the functions".

What will we do next week to help the development team meet the sprint goal?

1. We are going to establish a RDS (an online database service of AWS)

2. Connecting RDS to AWS.

3. Putting our local database into our web service.

Do we see any impediment that prevents us or the development team from meeting the sprint goal?

1. We are struggling with how can we connect the RDS with AWS.

2. After that, the next problem is how to remove our local database to the RDS.
